

I.O.T BOX CONFIGURATION SET-UP

STEP-3

You will need to identify the IP-ADDRESS of your WiFi-Router:

So you need to know several things about your WiFi-Router, your *routers address* and *login details* (username and password)

(Here is a link that can help you identify those two required details >>)
(<https://www.wikihow.com/Access-a-Router>)

Now Let us Configure our Network and I.O.T BOX :

After the I.O.T BOX has booted up you will need to do several things :

1. Reserve an IP Address for the I.O.T BOX
2. Set the I.O.T BOX as a DMZ
3. Port Forwarding the specific ports that will be required to be accessed over the internet

(Go to step 4...)
